

AI Accountability Policy Request for Comment | National Telecommunications and Information Administration

By NITA

April 13, 2023

NTIA's "AI Accountability Request for Comment" seeks feedback on what policies can support the development of AI audits, assessments, certifications and other mechanisms to create earned trust in AI systems. Much as financial audits create trust in the accuracy of a business' financial statements, so for AI, such mechanisms can help provide assurance that an AI system is trustworthy. Just as financial accountability required policy and governance to develop, so too will AI system accountability.

[...]
