

AI Is Biased. Here's How Scientists Are Trying to Fix It | WIRED

By Will Knight

December 20, 2019

Computers have learned to see the world more clearly in recent years, thanks to some impressive leaps in [artificial intelligence](#). But you might be surprised—and upset—to know what these AI algorithms really think of you. As [a recent experiment demonstrated](#), the best AI vision system might see a picture of your face and spit out a racial slur, a gender stereotype, or a term that impugns your good character.

[...]
