

COVID-19 Vaccine Hesitancy | Institute for Health Metrics and Evaluation

By Institute for Health Metrics and Evaluation

June 25, 2021

This map highlights areas of the US that would benefit most from increased vaccination acceptance. This view shows, by county, the % of survey respondents who answered “Yes, probably” or “No, probably not” when asked “If a vaccine to prevent COVID-19 were offered to you today, would you choose to get vaccinated?”
