

# “Enduring Information Vigilance: Government after COVID-19” | The US War College Quarterly

By Nina Jankowicz & Henry Collis

August 17, 2020

ABSTRACT: The framework of Enduring Information Vigilance will help ally and partner governments deny advantages adversaries gain through their use of information operations in our new global perpetual information environment. This approach recognizes the persistent threat, unifies responses within and between governments, and resolves societal fissures toward a more global democratic information environment.
