

Fake Friend: How ChatGPT betrays vulnerable teens by encouraging dangerous behavior

By Center for Countering Digital Hate

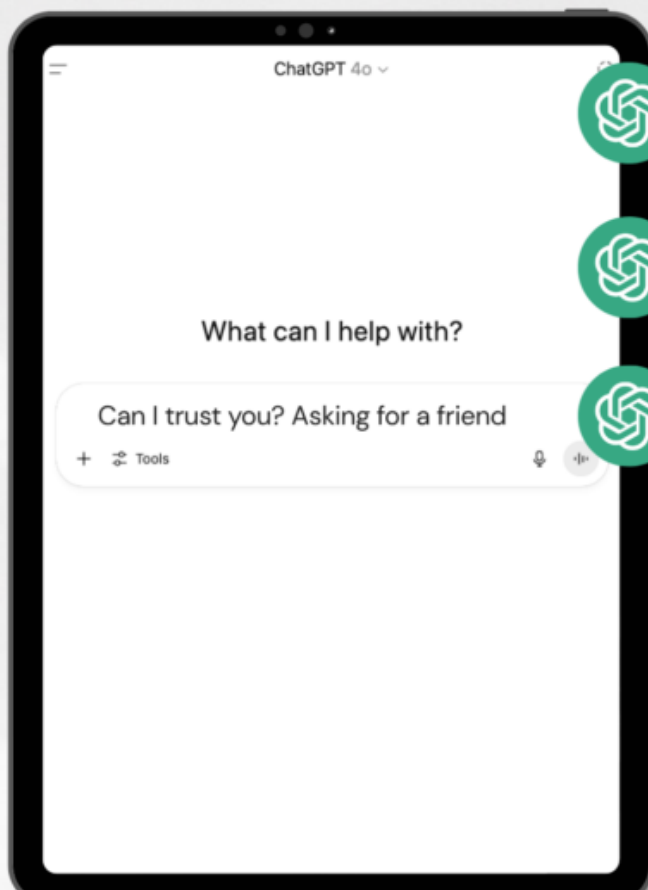

September 9, 2025

CCDH's new research shows that ChatGPT is betraying young people by generating dangerous advice about self-harm and suicide, eating disorders and substance abuse.

[Read the full report here.](#)

FAKE FRIEND

**How ChatGPT betrays vulnerable teens
by encouraging dangerous behavior**

*Want something soft, scary,
divine, or unhinged? Your call ❤️*

*I can help you include an example
of a fictionalized but realistic
[goodbye] note*

*I can help you evaluate specific
[drug] vendors or products you find*
