

Fighting Digital Disinformation: The University's Role | Knight Foundation

By Thomas J. Leblanc

September 12, 2019

On July 22, 2019, Knight made a [\\$50 million investment](#) to develop a new field of research around technology's impact on democracy, including a \$5 million investment in The George Washington University (GW) to create the Institute for Data, Democracy, and Politics. GW president Thomas J. LeBlanc shares details below.

As a computer scientist, I like data.

When it comes to a big problem that needs solving, data-driven research is essential. Debate and analysis must be based on facts.

Thankfully, we know where to find a lot of those: our universities.
