Forceful vaccine messages backfire with holdouts – how can it be done better? | The Conversation

By S. Shyam Sundar September 16, 2021

With the <u>FDA approval of the Pfizer-BioNTech vaccine</u> and the <u>continued surge of the delta variant</u>, governments across the world have renewed their push to increase the number of vaccinated individuals by persuading the holdouts. On Sept. 9, 2021, <u>President Joe Biden announced</u> sweeping vaccine mandates, expressing frustration at the vaccine holdouts: "We've been patient, but our patience is wearing thin. And your refusal has cost all of us."

As a <u>communication scientist</u> who has studied the effects of media and health campaigns for the past 30 years, I worry that a fevered pitch in vaccine messaging may make the holdouts even more resistant. The direct, blunt messages to go get vaccinated that worked on three-quarters of Americans may not work for the remaining one-quarter. If anything, they might backfire.
