

How AI is transforming journalism education | Reuters Institute

By Gretel Kahn

September 23, 2025

At the Reuters Institute, [we've delved](#) into generative AI's impact on journalism in the past three years. But GenAI is leaving a significant footprint on higher education as well.

With [so much reporting](#) on how GenAI is corrupting the critical thinking and writing skills of students, I was curious to know how this emerging technology is transforming journalism education. So I spoke with six professors from Cambodia, Peru, Serbia, Spain, the UK and the US to take stock of the state of journalism education in a world in which AI can create pitches for students, do their research, and even write their news articles - all with a well-crafted prompt.
