

How much access to data should be permitted during the COVID-19 pandemic? | Harvard Law Today

By Brett Milano

April 16, 2020

One of the more innovative ways to fight the battle against COVID-19 is through the tracking of data. Researchers at the [Berkman Klein Center for Internet & Society](#) at Harvard University are exploring the ways data can be mined to increase understanding of the virus and to fight it more efficiently.

The center's Executive Director [Urs Gasser LL.M. '03](#) is partnering with colleagues at Harvard Medical School and the T.H. Chan School of Public Health to pioneer the use of mobility data to track the spread and incidences of COVID-19.
