How to analyze Facebook data for misinformation trends and narratives | First Draft

By Carlotta Dotto

May 7, 2020

> As [coronavirus misinformation](#) continues to spread, knowing some basic methods for collecting and analyzing data is essential for journalists and researchers who want to dive under the surface of online information patterns.
>
> There is a mountain of data that can help us examine topics such as the spread of 5G conspiracy theories or where false narratives around Covid-19 cures came from. It can help us analyze cross-border narratives and identify which online communities most frequently discuss certain issues.
>
> [...]
