Imperial College London to launch COVID-19 'infodemic' knowledge platform using AWS

By Day One Team

July 7, 2020

> The COVID-19 outbreak has been accompanied by an 'infodemic', described by the World Health Organisation as, "an overabundance of information – some accurate and some not – that makes it hard for people to find trustworthy sources and reliable guidance when they need it".
>
> This means frontline healthcare workers are facing the impossible task of cutting through a 'global tidal wave' of information that might contain clues for the best possible treatments for COVID-19 patients – a disease that has never been seen before, with no established form of treatment.
>
> A new project, led by Imperial College London and enabled by Amazon Web Services (AWS), is responding to the 'infodemic' with the creation of a global knowledge platform.
>
> [...]
