New algorithms aim to stamp out abuse on Twitter | BBC News

By BBC News

September 18, 2019

> A new tool can identify Twitter accounts engaging in bullying with over 90% accuracy, according to researchers.
>
> Its algorithms classify two specific types of offensive online behaviour – cyber-bullying and cyber-aggression.
>
> Researchers at Binghamton University say it could be used to help find and delete abusive accounts.
>
> [...]
