

# Opportunity: Post doc positions in (computational) social science, law, and economics in new interdisciplinary Centre | University of Southern Denmark

By University of Southern Denmark

September 8, 2021

The Digital Democracy Center invites applications for one or more positions as Postdoc. The position is located in the newly launched Digital Democracy Centre DDC at SDU ([www.sdu.dk/ddc/](http://www.sdu.dk/ddc/)). The position is vacant from January 15, 2022 (or as soon as possible)

The DDC stands for a socio-technical, interdisciplinary approach combining theory and methods from social sciences and computer science, to study the impact of digital technology and AI on media, politics, and democracy. One of the largest challenges in this area is that research and new solutions are developed in single disciplines, which neglect the fact that current challenges are technological and social, legal, and ethical in nature. Through its research DDC will bridge this gap.

## Job description

We seek applications for the following projects (It is possible to apply for more than one project.

If you wish to be considered for more than one project position, please see information under "Application" below)
