# Our 'Modern' Congress Doesn't Understand 21st Century Technology | TechCrunch

By Jonathan Shieber

May 12, 2018

> Congress is the world's most powerful representative assembly. Yet, like much of the U.S. government, it does not have adequate 21st century technology knowledge or modern digital infrastructure for citizen input, much less interaction. Until we have an alternative that protects civic engagement data, the prevailing business models that rely on selling social connection will continue to be the equivalent of strip-mining democracy.
