August 12, 2020

An internal investigation by Facebook has uncovered thousands of groups and pages, with millions of members and followers, that support the QAnon conspiracy theory, according to internal company documents reviewed by NBC News.

The investigation's preliminary results, which were provided to NBC News by a Facebook employee, shed new light on the scope of activity and content from the QAnon community on Facebook, a scale previously undisclosed by Facebook and unreported by the news media, because most of the groups are private.
