

Russia's Use of genAI in Disinformation and Cyber Influence: Strategy, Use Cases and Future Expectations | CRC

By Christopher Nehring

May 12, 2025

Dr. Christopher Nehring, a recognized disinformation and security communication expert, examines the role of **generative artificial intelligence (genAI)** in Russian disinformation and influence operations. His analysis focuses on the extent to which state and state-affiliated Russian actors employ genAI in digital information environments and for what **strategic purposes**.
