The Toxic Potential of YouTube's Feedback Loop | WIRED

By Guillaume Chaslot July 15, 2019

From 2010 to 2011, I worked on YouTube's artificial intelligence recommendation engine—the algorithm that directs what you see next based on your previous viewing habits and searches. One of my main tasks was to increase the amount of time people spent on YouTube. At the time, this pursuit seemed harmless. But nearly a decade later, I can see that our work had unintended—but not unpredictable—consequences. In some cases, the AI went terribly wrong. Artificial intelligence controls a large part of how we consume information today. In YouTube's case, users spend 700,000,000 hours each day watching videos recommended by the algorithm. Likewise, the recommendation engine for Facebook's news feed drives around 950,000,000 hours of watch time per day. [...]
