

Turning technology into an accelerant for truth | Nieman Journalism Lab

By Raney Aronson-Rath

December 22, 2021

Earlier this month, Maria Ressa shared something with me that I've been thinking about ever since.

Maria — the winner of this year's Nobel Peace Prize alongside Russian journalist Dmitry Muratov — was talking with me on [The Frontline Dispatch podcast](#) about how this was the first time since 1935 that a journalist has won the award — and how she feels conditions are similar today in terms of what she calls “a global rise in fascism, a word I don't use lightly.”

“[Carl von Ossietzky](#) never got to accept his award, because he was languishing in a Nazi concentration camp,” she said. “The more I read about Carl, about the last time a journalist won this, the more I realized that: Yes, it could get better, but it could also get much worse. I think this moment is existential, and the accelerant is technology.

[...]
