

U.S. Surgeon General Issues Advisory During COVID-19 Vaccination Push Warning American Public About Threat of Health Misinformation | U.S. Department of Health & Human Services

By Surgeon General

July 15, 2021

U.S. Surgeon General Dr. Vivek Murthy is issuing the first Surgeon General's Advisory of this Administration to warn the American public about the urgent threat of health misinformation. Health misinformation, including disinformation, have threatened the U.S. response to COVID-19 and continue to prevent Americans from getting vaccinated, prolonging the pandemic and putting lives at risk, and the advisory encourages technology and social media companies to take more responsibility to stop online spread of health misinformation.
