Understanding Africa's AI Governance Landscape: Insights From Policy Practice and Dialogue

By Jane Munga and Sylvester Quansah | Carnegie Endowment for International Peace
September 17, 2025

> In Africa, AI has the potential to grow the continent's economy by an estimated $2.9 to 4.8 billion by 2030. In recognition of the AI promise, African stakeholders are increasingly positioning themselves to expedite AI adoption and realize its benefits.
