

Dataset Library

November 15, 2024

Welcome to MediaWell's Dataset Library, a curated collection of tools, guides, and resources to support evidence-based solutions to digital mis- and disinformation. Our library is made up of three sections: *Datasets & Data Repositories* offers access to raw data, and includes details on the update status (active/archived), data type, time period, and access type (open/restricted) of each resource; *Social Media APIs Guides & Toolkits* helps navigate the shifting landscape of requesting data from social media platforms; and *Peer Resources & Partner Organizations* provides a list of cutting-edge labs, centers, and think tanks working at the intersections of democracy and technology.
